MFAM Co., Ltd.			
About Our Company (Competitive Advantages)			
<p>MFAM Co., Ltd. was established in March 2018, and has our research institutes, researcher affiliated with the company. We want to take a leap forward by researching and developing all coatings such as solar panel coatings and home care coatings as well as automotive coatings. We are presenting a variety of products including coatings with excellent technology, and we are rewarding with the best service that quickly responds to customer needs. It is an ISO 9001:2015 and 14001:2015 certified, venture-certified company, and currently has about 10 domestic franchisee, so we are actively communicating with customers through online malls and participation in domestic and overseas exhibitions. In addition, we are continuously conducting R&D for the launch of new products, and we have launched home care coatings and fiber water repellent coatings, and plan to launch after completing R&D of coatings for solar panels in the following year. After launching a new product, we plan to focus on promotion and sales growth through active online and offline marketing to build an efficient corporate image.</p>

PRODUCT INFORMATION

PRODUCT NAME

Compressor

PRODUCT DETAILS

The compressor is a key component of air-conditioning system and functions like the heart of a person. It is operated by force originating from the vehicle engine, and repeats a cycle of inhalation, compression and circulation of the refrigerant.

PRODUCT NAME

Radiator

PRODUCT DETAILS

Radiator is a device, which is used to cool the engine through heat exchanging processes between the coolant and atmosphere in which, extra fans are applied to accelerate the heat exchanging process.

PRODUCT NAME

Condensor

PRODUCT DETAILS

Located front side of the vehicle's engine room, the purpose of condensor is to transform the refrigerant that has been transferred to the compressors after its heat exchanging process with the air has been completed.

KOAA-GTT SHOW COMPANY PROFILE

SHINWOOSHIN Co., Ltd.

About Our Company (Competitive Advantages)

Since its establishment, the company has been producing precision press and welding-based automobile parts, and has been supplying them to leading domestic & overseas automobile companies.

We are steadily increasing our export volume as well as the domestic market by developing our own clamp band and commercializing it based on core technologies such as deep drawing and argon welding.

We are under strict quality control through the APQP process, centered on our quality assurance team.

We have various type of certification such as Hyundai-Kia Motors SQ, IATF16949, INNO-BIZ, Root Industry, Ssangyong SSQ, etc. acquired major external quality management certifications.

No.16	KOAA-GTT SHOW COMPANY PROFILE			
<h2 style="text-align: center;">HONG SUNG BRAKE CO.,LTD.</h2>				
About Our Company (Competitive Advantages)				
<p>Hong Sung Brake Co., Ltd which is one of OE manufacturers in Korea is now producing "GOLD" brand. Korean government recognized Hong Sung "GOLD" as a top brand for 14 years consecutively and Hong Sung Brake Co., Ltd. Takes No. 1 award from Korean government. "Gold" brand has a full coverage for all Korean vehicles including Hyundai, Kia, Daewoo, Samsung and Ssangyong. Also "Gold" had developed many brake pads and shoes for foreign cars including Japanese, European and American cars. The Hong Sung Brake aims to achieve the highest quality index, Using its own proprietary technology, it also manufactures and sells ceramics, low-friction friction materials, and non-asbestos-based organic materials. In particular, ceramic-based friction materials use a soft material that maintains excellent braking, thermal stability and electrical insulation. Minimized friction noise, improved driver's braking feel and dust adhered to the wheel was greatly reduced. Please send your inquiry with any number (OE and/or Aftermarket No. - , FMSI, Akebono, MK Kashiya, ATE, WVA, etc.) and we will forward our price list, delivery and other terms and conditions of business. We are looking forward to receiving your prompt and positive reply. Please let me know your e-mail.</p>

KOAA-GTT SHOW COMPANY PROFILE

AUTOTOP CO.,LTD.

About Our Company (Competitive Advantages)

We, AUTOTOP Co., are a Korean manufacturer of auto parts that specializes in producing water pumps, oil pumps, and damper pulleys, all of which are crucial for automobile engines. Our company has set about production with ceaseless research and development and continuous quality management since 1993. As a result, our quality excellence is recognized in overseas markets as well as domestic. AUTOTOP produces the largest quantity of water pumps, oil pumps, thermostat and damper pulleys for automobiles in Korea. In addition, we also supply these parts for Japanese, American, and European cars as well, and are currently exporting our products to more than 50 countries worldwide. Our mission is to become an international auto parts manufacturer based on accumulated product **development capabilities, quality competitiveness, and customer's satisfaction. We guarantee that we will do everything we can to meet the various needs of domestic and overseas customers.**

PRODUCT INFORMATION

PRODUCT NAME

WATER PUMP

PRODUCT DETAILS

The function of the water pump is to cool the engine by facilitating the flow of coolant from the radiator to the cylinder's water jacket.

PRODUCT NAME

OIL PUMP

PRODUCT DETAILS

The oil pump is responsible for pressurizing engine oil from the oil pan, and then pumping it throughout the engine. Due to the pressurization from the oil pump, oil that has been purified through filters then properly flow into various parts of the internal combustion engine.

PRODUCT NAME

THERMOSTAT

PRODUCT DETAILS

The thermostat is a part of the temperature control system in the engine body. When the engine is cold, the thermostat is closed and the coolant is recirculated within the engine until the temperature is increased.

<h1>CLEAN AIR TECH Co. Ltd.</h1>			 BEST BUSINESS PARTNER CLEANAIRTECH CO.	
About Our Company (Competitive Advantages)				
<p>Clean Airtech has been doing its business as a professional filter manufacturer in Korea since it started in 1998. Based on experience and technology from a long history, it is producing automotive filters. Its flagship products are cabin filter, air filter, fuel filter and Eco oil filter. Clean Airtech focused on Korean domestic car market according to its initial policy and has built up a good reputation in the filter market from its users for reasonable price and good quality product certified by ISO. As a result, it is currently supplying to Korean large distributors, auto repair shops, online auto malls, etc. Clean Airtech is trying the best for overseas sales. It has steadily invested on development sector for years in order to meet the demand of overseas clients. Now it has a wide range of filters from Korean car models to Japanese, American, European car models. With active investment and immediate response to new trend, all members of Clean Airtech promise to offer customers the best product.</p>

Address		824-11, Baegok-daero, Idong-eup, Cheoin-gu, Yongin-si, Gyeonggi-do, Republic of Korea		
PRODUCT INFORMATION				
PRODUCT NAME		CABIN/AIR FILTER		
PRODUCT DETAILS				
<p>The air conditioner filter removes foreign substances and odors from the interior of the vehicle to maintain a pleasant indoor environment. Although the previous air filter only removes dust, it currently maintains a pleasant indoor environment by using a combination filter with a conventional dust removal filter and an anti-smelling filter (anti-bacterial filter). Also referred to as a filter through which air flows into the suction unit of a reciprocating engine.</p>				
PRODUCT NAME		OIL FILTER		
PRODUCT DETAILS				
<p>Engine oil is used repeatedly for lubrication, resulting in a mixture of worn metal powder or foreign matter from outside. Not only does it weaken the lubrication effect, but it also needs a device that will deteriorate the oil and purify it during circulation. This is an oil filter, which uses a paper microfilter, also called an oil cleaner. The oil filter has integral and detachable, and the structure consists almost similarly of elements, filter cases and check valves. A separatory formula can disassemble a component, but an integral formula cannot be disassembled. The oil pumped from the pump enters the oil filter inlet and passes through the element to filter the residue, leaving the outlet and going to the lubrication unit. If the element is blocked and it is difficult to pass through the oil, the bypass valve opens and supplies the oil to the lubricant without passing through the element.</p>		IMAGE

KOAA-GTT SHOW COMPANY PROFILE

JIN YOUNG PROTO CO., LTD.

About Our Company (Competitive Advantages)

Lists of Major Exhibition Items:

Automotive Components (TRANSMISSION CASE, RACK & PINION HOUSING, OIL PUMP HOUSING, etc.)

The casting process we have been mainly using is Sand Casting with wooden patterns not with permanent die mold so that we can produce the parts with comparatively short lead time and modify the wooden pattern with ease unlike the High Pressure Die Casting process. Since we remove the castings out of the sand mold by shakeout, moreover, we can cast dual structures and large-sized castings that cannot be shaped with other casting processes with permanent molds.

PRODUCT INFORMATION

PRODUCT NAME	Ball Joint Housing
PRODUCT DETAILS	
In an automobile, ball joints are spherical bearings that connect the control arms to the steering knuckles. They are used on virtually every automotive made and work similarly to the ball-and-socket design of the human hip joint.	

PRODUCT NAME	Inner Bush
PRODUCT DETAILS	
A bushing or rubber bushing is a type of vibration isolator. It provides an interface between two parts, damping the energy transmitted through the bushing	

PRODUCT NAME	Shaft
PRODUCT DETAILS	
A drive shaft, driveshaft, driving shaft, propeller shaft (prop shaft), or Cardan shaft is a mechanical component for transmitting torque and rotation, usually used to connect other components of a drive train that cannot be connected directly because of distance or the need to allow for relative movement between them

KOAA-GTT SHOW COMPANY PROFILE

Tesllon Inc.

About Our Company (Competitive Advantages)

We are a compressed air filter "eSeparator" manufacturer engaged in various application for automotive components. The quality of compressed air used in painting, CNC, air cylinder and automation equipment can be completely improved. The harmful components remove more than 99.9997% moisture, oil and particles can be separated at the same time. It is a filter that does not replace elements by developing the world's first series double cyclone. Therefore, it is possible to reduce the power cost due to low differential pressure.

Korea Clad Tech Co., Ltd.

About Our Company (Competitive Advantages)

We are a Clad Metal manufacturer engaged in various application for automotive components. With 30 years of technical know-how and experiences, we have been supplying high quality material parts to automotive companies in the KOREA.

Clad Metal Introduction

Clad metal means the bonded mechanism metal with ferrous metal and non-ferrous metal. By using the advantages of each metal, clad metal has the new properties. Manufacturing methods are rolling, welding, casting and extruding etc.

Clad metal's Property

High Thermal Conductivity

High Strength

Reduced Raw Material Cost

Good appearance

High brazing property

High electromagnetic shielding effect

KOAA-GTT SHOW COMPANY PROFILE

SAMKI INDUSTRY

About Our Company (Competitive Advantages)

Samki provides one-stop solutions that can meet the diverse needs of customers, ranging from product design, to design analysis, mold design, manufacturing, production, delivery, and maintenance, based on optimized manufacturing facilities.

For OVM TOOL SET we supply JACK, WRENCH, BAR, TOWING HOOK, CASE, etc., which is available as a single unit or set, and, for the FUEL SYSTEM, we manage the entire process for the fuel tank band that supports and protects the tank.

For the HYDROGEN SYSTEM, a key component of future vehicles, we supply the HYDROGEN FUEL TANK FRAME based on our accumulated technology and superior know-how. Customers are requesting production of various automobile accessories in the fields of TRANSMISSION and SUSPENSION ENGINE ROOM based on complete trust in Samki Industry.

PRODUCT INFORMATION

PRODUCT NAME

FUEL PUMP

PRODUCT DETAILS

Mechanical fuel pump is to transfer fuel from the fuel tank into the fuel bowls of the carburetor. In many modern cars the fuel pump is usually electric and located inside of the fuel tank. The pump creates positive pressure in the fuel lines, pushing the gasoline to the engine.

PRODUCT NAME

FILTER

PRODUCT DETAILS

Fuel filter is a filter in the fuel line that screens out dirt and rust particles from the fuel, made into cartridges containing a filter paper. Oil filter is a filter designed to remove contaminants from engine oil. Air filter is a device composed of fibrous materials which removes solid particulates such as dust, pollen, mold, and bacteria from the air.

PRODUCT INFORMATION			
PRODUCT NAME		Battery Pack Venting Device - Model 1	
PRODUCT DETAILS			
This is a safety device that prevents the explosion of a battery pack and protects the people in an EV by having a Rupture Disc burst at a pre-designated pressure level to release gases and a deflagration towards a safe direction in the event that the internal pressure of a battery pack rises due to external shock or fire while driving an EV.			
PRODUCT NAME		Battery Pack Venting Device - Model 2	
PRODUCT DETAILS		N/A	
If the pressure inside the battery pack rises due to an external shock or fire while driving an EV, it is a safety device that prevents the explosion of the battery pack and protects passengers by detonating a rupture plate at a pre-specified pressure and discharging gas in a safe direction. In a square shape, it is applicable to low-height battery packs.			
PRODUCT NAME		Battery Pack Venting Device - Model 3	
PRODUCT DETAILS		N/A	
If the pressure inside the battery pack rises due to an external shock or fire while driving an EV, it is a safety device that prevents the explosion of the battery pack and protects passengers by detonating a rupture plate at a pre-specified pressure and discharging gas in a safe direction. It is a structure that has a single rupture plate and cap, and is easy to assemble and inexpensive.

PRODUCT INFORMATION

PRODUCT NAME	COMPRESSOR
PRODUCT DETAILS <p>The compressor is a key component of air-conditioning system and functions like the heart of a person. It is operated by force originating from the vehicle engine, and repeats a cycle of inhalation, compression and circulation of the refrigerant. It compresses low-pressure and low-temperature gas from the evaporator, converts it into high-pressure gas and relays it to the condenser.</p>	
PRODUCT NAME	CONDENSER
PRODUCT DETAILS <p>Located at the very front of an auto engine compartment, the condenser cools and converts the heated and high-pressure refrigerant received from the compressor into a liquid form. The condenser can be installed separately or integrated into a cooling module with the radiator.</p>	
PRODUCT NAME	RADIATOR
PRODUCT DETAILS <p>The radiator is necessary to regulate engine temperature through a heat exchange process involving refrigerant and air flow. The coolant helps to cool the automobile engine by absorbing the heat generated by its operation. The heated refrigerant is cooled by being passed through the radiator before being returned the engine block to help maintain its proper operational temperature.</p>

PRODUCT INFORMATION

PRODUCT NAME

Inlet connector for Brake vacuum pump

PRODUCT DETAILS

- * Use : to control vacuum pressure in brake pump
 * Material : steel (JIS SUM22)
 * Technology : Tolerance 0.02, Zn plating
 * Supply directly to Mexico, China
 (End user : Toyota, Mazda)

PRODUCT NAME

Coolant tube for Powertrain

PRODUCT DETAILS

- * Use : to pass coolant in powertrain
 * Material : Low carbon steel(US-A513 1008),
 Stainless Steel, Welded tube, Extrusion tube
 * Technology : Powder coating, Robot welding
 * Supply directly to USA (End user : FCA)

ASPIC Co. Ltd.

About Our Company (Competitive Advantages)

Fineblanking is a high-precision near-net process combining principles of metal stamping and cold-forming. Different from conventional metal stamping, fineblanking incorporates the use of special triple action presses. Three concurrent forces - V-Ring force, Counter force and Cutting force - act in conjunction extrude parts from strip or coil material. The key to fineblanking is the triple action hydraulic press.

CNYTEC Co., Ltd.			
About Our Company (Competitive Advantages)			
<p>CNYTEC Co., Ltd. Is a company that develops, researches and produces BLACBOX for vehicles(called Dashcam, Car DVR, Driving Recorder, etc. in the Anglosphere). We possess 1-channel, 2-channel, 3-channel and multi-channel dashcams in our inventory and we are currently distributing them in Korea. Also, We are developing a dashcam in the Fleet management Sysmtem(FMS). This FMS product sends a vehicle`s video and its driving data in real time to a server, which allows a manager to check the vehicle`s condition. If needed and based on the vehicle`s real-tim footage, the manager can talk to the driver of the vehicles and are able to communicate via a cellphone. Oure company consists of a group of experienced experts who have developed and sold dashcams for many years. We aim to develop a highly reliable and a distinctive dashcam and supply them to the public. If you are thinking of distributing our completed products or planning an OEM/ODM, CNYTEC will be your best choice.</p>

TECHNOBIO Co. Ltd.					
About Our Company (Competitive Advantages)					
<p>Since our establishment in 1995, we have been producing eco-friendly fuel additive (brand name: POWER-Z) for marine and automobile fuel. Based on the experience and know-how of 20 years of research and technology development, we continuously have developed the quality and performance of fuel additives used in automobiles. We have successfully completed various research and development projects and as a promising company (Korea Energy Technology Research Institute), we have succeeded in achieving 20% reduction in NOx, 50% reduction in fine dust (PM) and 2% reduction in fuel consumption conducting the first phase project (2003 ~ 2006) and the second phase project (2006 ~ 2009) of Next-generation core environmental technology development, Ministry of Environment National Project. Then, we conducted "Purchase Condition New Product Development Project" of Small and Medium Business Administration. As a result of the performance test comparing before and after using a fuel additive in a 2-stroke engine of 40,000 kWh, which is operating in the Jeju Island Thermal Power Plant (2013.7 ~ 2014.6), it was exceeded by 58.8% of fine dust (PM), 27.34% of NOx and 2.157% of saving of fuel consumption.</p>

<h2 style="text-align: center;">UNICAMP Co. Ltd.</h2>					
About Our Company (Competitive Advantages)					
<p>* For Hyundai Motor Co.'s Grand Starex camping car, the Uni-Camp's Univan RT model is the most price-competitive one for the Grand Starex-based campus van currently on the market, compared to the sales price of nearly 63 million won including packages.</p> <p>* The results from the behavior analysis of the campus are reflected in the Univan RT model. It ruled out kitchen facilities with less frequent use, and can instead be used as a bed by using second row bench-type sheets and link panels. Two adult males, two adults and one child are fully available</p> <p>* Coupling the first row seats with the second row seats allows for comfortable dining, play, work and relaxation. A removable table is provided between columns 1 and 2 for use in accordance with the application.</p>

No.120	KOAA-GTT SHOW COMPANY PROFILE			
DAEHAN Autotech Co.,Ltd.				
About Our Company (Competitive Advantages)				
<p>○ Since 2012, we have been aiming at "customer satisfaction" and "quality first" and are a leading company in the die casting and precision processing fields that manufacture machine parts and automotive parts using materials such as aluminum and stainless steel</p> <p>○ As a result of its dedication to quality and technology development since its establishment, it has been well received by customers for its ultra-precision product casting and breakthrough quality improvement. We process Outlet water, Housing, Tube Assy, etc., and battery cases(gravity casting), which are the core parts of electric cars, which are being supplied to Renault-Nissan Alliance via Korean customer.</p> <p>○ Innovative quality improvement Die casting is a casting method that mass-produces high-precision castings in a short time by injecting molten metal into a precisely manufactured mold by high pressure according to the design and required quality of the product. As it is possible to integrate, more than 70% of aluminum parts used in automobile parts are produced by die casting. We produce products such as housing, bracket, control body, support stator, etc. which are main parts of automatic transmission.</p> <p>○ We have established a joint venture in China to produce and assemble parts that apply to the core parts of the automobile, which is an EGR system, using the stainless steel precision casting lost wax method, and supply them to BMW, Ford, and Nissan.</p> <p>○ For new projects which is developing in our company are ISUZU HSG(Japan), ES6 Main BRKT(E/V) Thermostat HSG(LJL), Plate Brake Booster(Renault)</p>

DONGNAM SPECIAL CAST STEEL Co.,Ltd				
About Our Company (Competitive Advantages)				
<p>Dong Nam Special Cast Steel Co.,Ltd is an Alloy steel and Special Cast Steel manufacturing company established in 1991. The company sells these commodities domestically and internationally, particularly to manufacturers of industrial machines and heavy construction equipment . The company also manufactures Sand Machine and makes spare part for Crushers and Mining Plants.</p> <p>The Sand Machines are made of a special metal material. They have an excellent washing ability and production capacity. The classifiers are highly efficient sand classification systems, with having an excellent washing and dehydration capacity and maintenance free and durable. The Filter Press show excellent performance with variable industrial sludge treatment; they have a high dehydration capacity and are fully automated. The Sewage Treatment System are highly efficient and fully automated waste water recycling systems. A pressurized dehydration system is used to make the sludge into transportable cakes. These systems have a high performance capacity.</p> <p>We hope you will consider purchasing these products from us and we would welcome a visit from you. We would appreciate the opportunity to show you our production facilities and our products in motion and to establish a relationship with such a highly regarded company as yours. We wholeheartedly welcome your visit to our company.</p>

PRODUCT INFORMATION

EGR Cooler Module

Various processes are required to produce this product. Assembly, paste, pressing, expansion, welding, CF inspection, vacuum furnace brazing, leak inspection, and packaging are required. We have high technology accumulated knowhow for a long time.

Flange

To produce this product, a powder metallurgy process is required. This product is a Flange delivered to BMW. We have 2 patents for this flange to make high density and high strength stainless steel. We can manufacture flanges with various shapes and materials.

Cad/Cam Disc

We produce Cad/Cam disc, dental prosthetics(restorations). It has Nickel alloy and Cobalt alloy. Because we produce it through the powder metallurgy method, it is far superior to casting products.

COMPANY OVERVIEW

YUSEUNG manufactures automotive parts based on core technology such as Furnace Brazing(vacuum & continuous), machining, powder metallurgy, and sintering accumulated for a long time. Its main products are eco-friendly parts of internal combustion engines such as the EGR cooler and pipe

Competitiveness & Sales Points

We use various processes to produce optimized products. Especially, we can reduce cost through Powder Metallurgy process. In particular, we have experience in serving customers and showing high quality standards while in charge of performing parts for various automobile companies such as BMW, Ford, GM, Land Rover, Hyundai, and Kia.

PRODUCT INFORMATION

	<p>Spindle is forging component to maintain stable rotation of tire wheel and combination with car axle.</p> <p>We supply spindle to domestic market and export to Germany and India.</p>
AXLE PARTS _ SPINDLE	
	<p>Shaft and Yoke shaft are forging products in Power train part to decrease the trembling by adjusting balance of automobile. It produces in 1600ton forging press with vertical forging.</p>
POWER TRAIN PARTS_SHAFT	
	<p>Socket and Yoke for steering system parts to change driving direction. In case of Socket, it is the forging part of "Tie rod end", "Ball joint" and "Rack end". Socket is recognized the quality in world wide market, we export to Japan over \$3 million.</p> <p>In case of Yoke, it is components of handle and has the biggest sales in domestic market.</p>
STEERING PARTS_SOCKET, YOKE	

COMPANY OVERVIEW

Competitiveness & Sales Points

DaeWon Forging is established in 1997 as a hot forging specializing company to produce major automobile parts like SPINDLE, SHAFT, BRACKET, GEAR, YOKE, HUB and etc. Hot forged parts are durable and we can produce various size items. (small : nut, yoke, etc / large : shaft, spindle, yoke shaft, etc.) In case of small size item, we could forging detailed shape. We introduced 1600ton and 1000ton press in 2013, 2016. It is specializing to produce long length items through vertical forging. With continual effort in technology research and production enhancement, we have been recognized as the company with the best quality and competitive products. We have been exporting products to USA, JAPAN and INDIA. We have been recognized our products quality from world market, we try to expand our business to world wide through our sales abilities.

<h2>Duksungmetal industry.CO.,LTD</h2>			
About Our Company (Competitive Advantages)			
<p>Founded in 1978 as Duksung Metal , it became Duksung Metal Co., Ltd. in 1997 and, based on its technology and confidence in quality accumulated through years of ceaseless research and development, the company has solidified its position as an essential member of the Korean Automotive Parts Industry. It is also securing competitiveness in the global market through manufacturing of products with high added values such as oil pans made of cold jointing technique.The products of Duksung Metal are supplied not only in domestic market but also to North and South Americas, Europe, Southeast and Central Asias, expanding its market to all corners of the globe and gathering praises from customers throughout the world with excellent quality and advanced technology.</p>

KOAA-GTT SHOW COMPANY PROFILE

Jeil HTC

About Our Company (Competitive Advantages)

Premium Heat Treating Services from a Well-Established Provider.

If you need a niche provider of heat-treating services, one that has a formidable reputation for quality, speed and competitive pricing, look at Jeil HTC. We specialize in providing a range of top-grade heat treating services for customers with aluminum, steel, alloy, or metal parts that require heat treatment in Korea (Of course it is South). No matter what processes your components need to go through to obtain the durability and corrosion resistance you need, we can get the job done.

KOAA-GTT SHOW COMPANY PROFILE

YOUNGWAN Co.,Ltd

About Our Company (Competitive Advantages)

We product machine parts and special cold-forged products for automobiles.

Since founded in 1985, Youngwan has continued to grow in the automobile industry as a cold-forged product specialist over the past 30 years.

Focusing on automobile braking and steering components, Youngwan, with its innovative and pioneering spirit, has contributed to the technological development of precision asymmetric cold forging industry.

From cold-forging products to automobile components, Youngwan demands itself to provide only the best products, and will continue to provide only the best products through restless technological development and ruthless quality management.

PRODUCT INFORMATION

PRODUCT NAME	(name)
PRODUCT DETAILS Our company has a number of precision cold forging equipment, six station cold forging forming. The maximum material cut-off diameter is 33mm, The main feature of cold forging process is no cutting, the material utilization rate is very high, and the metal material streamline will not be cut off. Therefore, the strength of the finished product is higher than that of the parts processed by cutting or casting. Under certain batch production conditions, the cost of cold heading processing is much lower than that of other processing methods.	
PRODUCT NAME PRODUCT DETAILS Notable products include key functional components for the brake system such as Ball in Ramp Caliper components and Motor on Caliper, and key components of the steering column system, which all are manufactured through a cold-forging process.	
PRODUCT NAME PRODUCT DETAILS This product adopts advanced cold heading technology, which can guarantee small tolerance without CNC machining. Increase production capacity and reduce costs.

President	KIM TAE HEON	Sales Contact	KIM TAE HEON
Webpage	www.gabsan21.com		
Address	192,484beongil Daegotro Daegot-myeon Gimpo-si Gyeonggi-do Korea		

PRODUCT INFORMATION

PRODUCT NAME	Continuous casting(name)
PRODUCT DETAILS	
<p>Continuous casting is produced by casting a copper alloy molten metal through a graphite mold to produce castings, pipes, slabs, etc. in various sizes to produce a casting product with less segregation, uniform structure and small particle size, You can extend it.</p> <p>We are doing our best to produce and supply products that have no defects such as bubbles and have excellent mechanical properties of metal.</p>	
PRODUCT NAME	Centrifugal casting
PRODUCT DETAILS	
<p>In centrifugal casting, by injecting molten metal while rotating the injection mold, the impurities are separated toward the inner diameter by centrifugal force, and there is no bubble, and the structure is densely formed. It is possible to produce parts with high abrasion resistance and long lifetime of machine.</p>	
PRODUCT NAME	Sand casting
PRODUCT DETAILS	
<p>Sand casting is a traditional casting production method in which molten metal is injected into a sand mold. This is a production method suitable for small-scale production of irregularly shaped casting or various types of product.</p>

COMPANY OVERVIEW

Competitiveness & Sales Points

Established in 1985 as a specialized freezing machine installer and began manufacturing freezing machines since 1993, Daeho Cooler Co.,Ltd. Is now your proud manufacturer of research facilities and heat exchanger facilities helping facilitate industrial thermal fluid facilities, thanks to our Class 1 Engineer and specialized senior executives.

Daeho Cooler Co.,Ltd. Hereby promises your unrelenting research and development of technologies, seamless supply system and reliable products in your favor. With unceasing process of research and development for Mindmap Administration, Daeho Cooler Co.,Ltd. Will always serve you the best.

1. Excellent durability
2. Worldwide using and selling by indirect import
3. Experienced in various applications
4. Prevent loss of cooling capacity
5. After blackout, it comes back automatically.
6. cold and hot water combined

------------------------	--	--------------------	--	--------------------	---

PRODUCT INFORMATION

	<p>[What is V-LOCK?]</p> <p>V-LOCK is a screw thread system with a perfect anti-loosening function. When fasteners are joined together with a specially threaded fastener, which has the V-LOCK screw thread on one of the bolt and nut, the loosening of bolts and nuts during vibration and impact is prevented.</p>
<p>V-LOCK BOLT</p> 	<p>[Principle of V-LOCK]</p> <p>The screw thread of V-LOCK consists of two tangential parts (the first and second tangential parts) to induce double contact point locking with the other object with a common screw thread. It maximizes the friction force between the bolt and nut screw threads through double contact points and performs an anti-loosening function.</p>
<p>V-LOCK NUT</p> 	<p>[V-LOCK Features]</p> <ul style="list-style-type: none"> · Anti-loosening function when it is joined with fasteners with a common screw thread(V-LOCK bolts and common nut / V-LOCK nut and common bolt) · Passed the maximum vibration test (NASA standard : NAS 3350) · Completed the anti-loosening function test that measures the change in axial force (Junker test : DIN 65151) · Obtained the world's first DNV-GL classification certification for fasteners · Daekwang Metal's patented technology · Low unit price (Same manufacturing process as the common bolts and nuts excluding the dies, tap and bite the form V-LOCK screw thread) · Wide range of applications (Applicable regardless of the shape, material and plating of products)
-	<p>[V-LOCK Effects]</p> <ul style="list-style-type: none"> · Perfect anti-loosening effect during extreme vibration and impact · Modifies the screw thread of the common bolt and nut specifications → Alternative for existing products · Component parts, such as washers, double fastening, coating processes, screw adhesives, and others are not required. → Cost reduction due to the single fastening of the bolt and nut · Same torque as the fastening and loosening of common bolts and nuts → Increases work efficiency
-	

COMPANY OVERVIEW

<p>Daekwang Metal Co., Ltd is a fastener manufacturer that makes various bolts, nuts, washers, rivets, and other products. We have been manufacturing and wholesaling fasteners for 40 years. Since converted into a corporation in 2004, we have been developing our products to satisfy our customers with the best quality as well as the most competitive price. Owing to our accumulated technologies and very abundant field experience, we recently launched the V-LOCK bolt and V-LOCK nut which is the most perfect anti-loosening(Self-locking) technology using the modified screw threads. We will always do our best to offer the best products with the highest quality and the best service standing on the basis of quality management system ISO 9001, IATF 16949, DNV • GL.</p>	<p>Competitiveness & Sales Points</p> <ul style="list-style-type: none"> · Low unit price (Same manufacturing process as the common bolts and nuts excluding the dies, tap and bite the form V-LOCK screw thread) · Passed the maximum vibration test (NASA standard : NAS 3350) · Completed the anti-loosening function test that measures the change in axial force (Junker test : DIN 65151)

PRODUCT INFORMATION

CUPLUS

(Strong Point 1) Most low-priced products are low-quality and short-term products from China. Also, there are currently no multi-function products except CUPLUS. Therefore it improves the possibility and differentiated 3 in 1 function, which includes product's design.

(Strong Point 2) Can be installed in any vehicles, and minimizes interference during operating the gear and when passenger is getting on the car. Also, it does not interfere the driver's vision therefore improves the environment inside the vehicle.

(Strong Point 3) Unlike mass-produced products that do not have various certifications and patents, CUPLUS has been certified international standards such as KC, FCC, Qi, Rohs, and CE. This certifications give consumers credibility.

- ① Cup holder with 1 + 1 extension structure
- ② Tray creates sufficient storage space
- ③ Wireless charging is available without a pop-socket

- Extended cup holders that can be added for deficient cup holders in the vehicle.
- Adjustable height of cup holder
- General purpose design for all domestic and international vehicles
- Tray that enables eating food inside the vehicle and placing belongings for driving

COMPANY OVERVIEW

Competitiveness & Sales Points

'kustom plastic' is a brand that makes a practical product with a simple design by using a plastic material. We are designing robust, space-friendly products with an uncomplicated structure.

2020 CES participation, FCC, CE, Rohs certificated
3 in 1 Car cupholder

Because of Corona-19, entering a restaurant is getting difficult and it makes the increase of using drive-thru, which means many people eat meals in their car. This situation increases the needs of car cup holder and tray(equipped with 10W high-speed charging function).

Taechang Forging Co. Ltd.

About Our Company (Competitive Advantages)

We manufacture cold-forging parts for automobile chassis and driving parts. Production (forging + processing), Although the company is not very old, it is a company with excellent customer satisfaction due to our technology and quality capabilities. Currently developed and mass-produced for the first time in Korea The spherical SPIDER, a constant velocity joint part, We think it is our only competitive edge, and we plan to focus on constant speed joints and DIFF-ASSY components.

PRODUCT INFORMATION

PRODUCT NAME	C-V JOINT PARTS
PRODUCT DETAILS	
Without changing the rotational speed between the non-linear vehicle drive shaft and linear vehicle drive shaft and the driven shaft As a component that can deliver power evenly To compensate for changes in rotational speed, materials with large bending angles are attached to both ends of the shaft.	
PRODUCT NAME	T/M GEAR & PARKING SPRAG
PRODUCT DETAILS	
As part of AUTO-TRANSMISSION, it is used for car parking SPRAG for gear and fixing. --- Driving PART	
PRODUCT NAME	
PRODUCT DETAILS	
Differentiate the rotational speed between the left and right driving wheels of the vehicle, and drive torque For DIFF-ASSY, which distributes evenly to the left and right driving wheels and functions to smoothly turn the vehicle by rotating the tires on the outside rather than the tires on the inside when the vehicle is turning.

WON JIN INDUSTRY Co.

About Our Company (Competitive Advantages)

Established in 1997, WONJIN INDUSTRY Co. is specializing and the only domestic company for special cemented carbide brazing, coolers for die casting molds and manifolds based on decades of accumulated technology. In 2014, we moved to HasinbeonYeong-ro, Saha-gu, Busan for expansion. We focus on the basics and strive to fulfil our customers' expectations through thorough quality control in a clean and hygienic environment. In 2019, we set up a dedicated R&D department to improve our existing processes and take the next step through product development and cost reduction.

- Quality comparable to world-class competitors in the die casting cooler field.
- Korea's best in die casting cooler field.
- Excellent price competitiveness compared to competitors.
- Performance for delivery of product to overseas die casting mold companies.

PRODUCT INFORMATION						
PRODUCT NAME			Cooler			
PRODUCT DETAILS						
A cooler component used in the cooling device of die casting molds. Parts used to improve quality by lowering the defect rate of products by improving the working efficiency and facilitating quality control by facilitating circulation of the cooling fluid for cooling the mold installed inside the mold. Manifold - supply and discharge cooling water to die casting mold. Parts that are mounted directly on the mold or installed on a separate supporter and that supply and discharge cooling water easily.						
PRODUCT NAME			Core pin			
PRODUCT DETAILS						
Parts used to construct the inner diameter of a die-casting (injection) mold hole. Parts for easily removing gas from the area where gas is collected.						
PRODUCT NAME			Insert			
PRODUCT DETAILS						
A component that is inserted into a part of die casting mold to create a specific shape. Parts used to cast into a specific shape after making a mold because a specific part was not considered before mold design or because the shape of the product was complex.
